

**SITE INSPECTION REVIEW FORM**

**SITE NAME:** Flowen Oil Delaware Valley Corp  
**CITY, STATE:** Camden, New Jersey

**ALIASES:** none

**CERCLIS I.D.#:** NJD 980536577

**FISCAL YEAR & QUARTER FOR SCAP:** 3<sup>rd</sup> quarter

**CONTRACTOR RECOMMENDATION:** Expanded Site Inspection

**EPA RECOMMENDATION:** Expanded Site Inspection

**PA METHOD SCORE =** 60.22

**WAS SAMPLING CONDUCTED BY CONTRACTOR?** Yes

**COMMENTS:**

The facility recycles waste oil, is completely paved, fenced and surrounded by a 6 inch curb. Waste units of concern include drums and tanks, spills have also been documented. On site monitoring wells were analyzed for volatile organics, petroleum hydrocarbons, total organic carbon, and metals. Concentrations above the maximum contaminant levels were not noted.

Due to potential groundwater contaminants resulting from on site spills and the large population being served by groundwater within the area of the site, an expanded site inspection has been recommended.
